

FIRST INNER BEAUTY BRAND

AIBLAB

AWAKEN YOUR INNER BEAUTY

We believe that each person is endowed with an inherent, unique beauty. At AIBLAB, we utilize the cutting-edge pharma-ceutical expertise to awaken and maintain your distinctive beauty in a manner that epitomizes health and vitality

AIBLAB

Formulated to protect your
unique inner beauty,

A premier inner beauty brand created by
pharmacists and medical experts.

Produced with integrity for the ones we love.

We meticulously select premium ingredients, optimize
dosages, and incorporate synergistic components for
maximum efficacy.

"Is it possible to get all the essentials in a single tablet?"

"Why can't supplements be delicious?"

These fundamental questions paved the way
for the creation of AIBLAB.

AIBLAB

AWAKEN YOUR INNER BEAUTY

MADE IN KOREA

01

AIBLAB Lipo- Glutathione Collagen

Beauty that begins
beneath the surface.

"Could we take all our supplements at once? And if we had to choose just one for skin health — what would it be?" We live in an age of endless options and conflicting advice.

Most of us don't have the time to figure out what we actually need. We wanted to cut through the noise — and ask a simpler question: what if one supplement could do what many couldn't?

That single question is where everything began.

"Where 3.5th-generation liposomal technology meets 500Da ultra-low molecular collagen: Inner beauty with unparalleled absorption."

AIBLAB
Lipo- Glutathione
Collagen

Suggested Use

"Chew 1-3 tablets once daily."

6 Key Features

01

Standard vs. 3.5th-Gen Liposomal Glutathione

: Features proprietary 3.5th-gen technology with 100x higher absorption and intracellular retention compared to standard glutathione.

02

High-Potency, Ultra-Low Molecular Collagen

: Optimized bioavailability using premium collagen under 500 Daltons.

03

Complete 8-Type Vitamin B Complex

: A vitality powerhouse containing all 8 B-vitamins to effectively catalyze glutathione production.

04

Selenium & Vitamin C Synergy

: Formulated with key synergistic ingredients essential for antioxidant defense and collagen synthesis.

05

Convenient Chewable Format

: Refreshing orange-flavored chewables for water-free consumption (Made with premium Israeli orange concentrate).

06

Sugar-Free & Glycemi Friendly

: Sweetened with Xylitol for a healthy taste, ensuring safe consumption for all without blood sugar concerns.

Synergy

Liposomal Glutathione

Most supplements never fully deliver on their promises — not because the ingredients are wrong, but because the body simply can't absorb them. Liposomal technology changes that. Its phospholipid bilayer closely mirrors the membrane of small intestinal cells, allowing nutrients to pass through directly — achieving up to 8 times the absorption rate of regular glutathione.

The core of efficacy: absorption.

Ultra Low Molecular Collagen

Not all collagen is created equal. Each serving of 3 tablets contains 2,000mg of collagen with a molecular weight of under 500Da (approximately 700mg per tablet) — smaller molecules that are absorbed faster and more efficiently than standard low molecular collagen, reaching all the way down to the deeper layers of the skin where it matters most.

Premium British Vitamin C

Glutathione doesn't work alone. Vitamin C is an essential co-factor in its biosynthesis, while also supporting collagen synthesis, skin brightening, and antioxidant protection — quietly doing the work that makes everything else possible.

Translucent, healthy skin — nourished from within.

Comparison Table

	Regular Glutathione	Liposomal Glutathione
Absorption Rate	1-10%	Up to 80%+
Stomach Acid Resistance	Breaks down easily	Protected by phospholipid bilayer
Intestinal Absorption	Limited — most is lost before reaching the intestine	Direct — liposome structure mirrors the intestinal cell membrane
Bioavailability	Low	Up to 8x higher
Efficacy	Inconsistent	Stable and reliable

Made for people like you

- Want brighter, more even skin but feel like topical skincare alone isn't delivering real results.
- Are looking for one supplement that covers skin radiance, collagen, and antioxidant protection — without juggling multiple products.
- Dislike swallowing pills and want something effective they can actually enjoy taking every day.
- Are mindful of sugar intake but still want something that tastes good enough to stay consistent.

02

AIBLAB Plant-Based Melatonin : Melajoy

Sleep the way you were
meant to.

"Is there a supplement that helps you truly sleep — and wake up feeling like yourself again? Not dressed up with token ingredients dosed at 0.01mg, but built on ingredients that actually matter, at levels that make a difference."

Thinking of my parents, who toss and turn through the night. Thinking of myself, lying awake when the world has long gone quiet. Sleep is the foundation everything else is built on — and every person who puts their trust in what we make deserves something that actually works.

That question is where everything began.

"A synergy of **plant-based melatonin** and **L-theanine**: Your premium solution for restorative sleep."

Suggested Use

"Take 1 tablet once daily with plenty of water."

AIBLAB
Plant-Based
Melatonin : Melajoy

6 Key Features

<p>01</p> <p>Plant-based Melatonin (2.5mg)</p> <p>: Formulated for restful sleep and a refreshed morning using safe, botanically derived melatonin</p>	<p>02</p> <p>L-Theanine for Sleep Quality</p> <p>: Promotes mental relaxation and eases stress-related tension by stimulating alpha brain waves</p>	<p>03</p> <p>Magnesium (80mg)</p> <p>: Works synergistically with GABA to relax muscles and nerves for profound rest</p>
<p>04</p> <p>GABA (Rice Germ Extract)</p> <p>: A key neurotransmitter that supports deep sleep by stabilizing the central nervous system</p>	<p>05</p> <p>Inositol</p> <p>: Enhances sleep quality by stimulating melatonin production and aids in mood regulation and anxiety relief</p>	<p>06</p> <p>Full-Spectrum Vitamin B (100% RDA)</p> <p>: Contains 100% of the daily allowance for all 8 B-vitamins to ensure a morning vitality boost</p>

Synergy

GABA + Magnesium

Sleep isn't just about closing your eyes — it's about staying asleep. Magnesium enhances the activity of GABA-A receptors, amplifying GABA's natural sleep-inducing effects at the neurological level. The result is a deeper, more sustained rest. It is particularly effective in reducing the kind of nighttime waking that leaves you staring at the ceiling at 3am — helping you stay asleep, and wake up actually feeling rested.

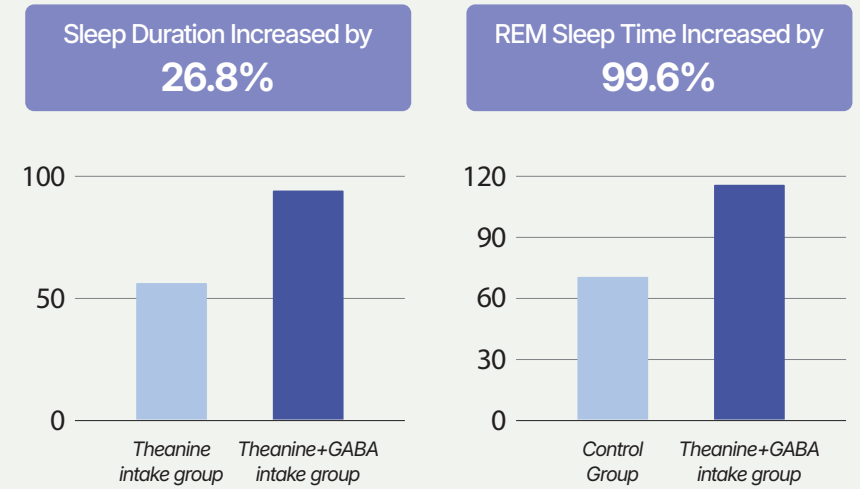

GABA + L-Theanine

A restless mind is one of the most common barriers to good sleep. L-Theanine addresses this directly — promoting relaxation by stimulating alpha brainwaves, the same quiet, calm state the brain enters just before sleep. Combined with GABA, it works to shorten the time it takes to fall asleep while deepening overall sleep quality. For those whose nights are disrupted by stress or an overactive mind, this pairing offers something closer to real relief.

L-Theanine + Magnesium

True rest requires both the mind and body to let go. L-Theanine eases mental tension, quieting the thoughts that keep you from drifting off. Magnesium works in parallel — stabilizing the nervous system and releasing physical tension held in the muscles. Together, they guide you into a state where sleep doesn't have to be chased. It simply comes.

The Synergistic Effect of L-Theanine & GABA on Sleep

In a study comparing L-Theanine alone against a combined L-Theanine + GABA intake group, the results were striking.

Sleep duration increased by 26.8%, and REM sleep time — the deep, restorative phase where the body and mind truly recover — nearly doubled, rising by 99.6%. The data makes one thing clear: it's not just about falling asleep. It's about the quality of sleep that follows.

Made for people like you

- Lie awake at night with a racing mind, unable to switch off no matter how tired they are.
- Wake up in the middle of the night and struggle to fall back asleep — never quite feeling rested by morning.
- Travel frequently across time zones, or work irregular hours that leave their sleep cycle constantly out of sync.
- Want to wind down more naturally at the end of the day, without relying on anything harsh or habit-forming.

03

AIBLAB Lipo- Glutathione Collagen Max

No shortcuts. Just the best — for you, and the ones you love.

"Could we carry forward everything that made Lipo-Glutathione great — and take it further?"

The original Lipo-Glutathione was built on a simple belief: that people deserve better than what the market was offering. And it worked. But we kept asking ourselves — what if we could do more?

We wanted to make the original more accessible, so that great nutrition wouldn't feel like a privilege. And at the same time, create something more — a version with nothing held back. Lipo-Max was born for those who want the very best for themselves, and for the people they love most.

That question is where everything began.

“High-End Potency: The convergence of 85% pure **Cellg8™ technology** and a complete **Vitamin B complex**”

AIBLAB
Lipo- Glutathione
Collagen Max

Suggested Use

“Chew 1-3 tablets once daily.”

6 Key Features

01

Ultra-Pure Liposomal Glutathione (141.78mg)

: Features high-potency Cellg8™ raw material with a superior 85% purity level

02

Ultra-Low Molecular Collagen

: Maximizes bioavailability by utilizing premium collagen under 500 Daltons

03

Complete Vitamin B Complex

: A vitality powerhouse with all 8 B-vitamins to strongly catalyze glutathione production

04

Antioxidant Synergy

: A strategic blend of Selenium and Vitamin C to support both protection and collagen synthesis

05

Premium Orange Chewable

: A delicious, water-free format crafted with Israeli orange concentrate

06

Great Taste, Zero Worries

: Sugar-Free & Glycemic-Friendly
Uses Xylitol to provide a healthy sweetness that everyone can enjoy safely and deliciously

Synergy

Liposomal Glutathione

Most supplements have an invisible problem: the body absorbs far less than what's on the label. Liposomal technology solves exactly that. Its phospholipid bilayer mirrors the membrane of small intestinal cells, allowing glutathione to pass through directly — achieving up to 8 times the absorption rate of regular glutathione. Because the best ingredient in the world only works if your body can actually use it.

Ultra Low Molecular Collagen

Collagen is only as effective as its ability to reach the skin. Each serving delivers 2,000mg at a molecular weight of under 500Da — small enough to absorb faster and travel deeper than standard low molecular collagen, all the way to where collagen synthesis actually happens. This isn't just collagen. It's collagen that arrives.

Premium British Vitamin C

Behind every skin supplement that works, Vitamin C is quietly doing its part. An essential co-factor in glutathione synthesis, it also drives collagen production, brightens skin tone, and protects against the daily damage that dulls the complexion over time. The ingredient that makes everything else work harder.

Translucent, healthy skin — nourished from within.

Comparison Table

	Regular Glutathione	Liposomal Glutathione
Absorption Rate	1-10%	Up to 80%+
Purity	Standard	85% High-Purity
Intestinal Absorption	Stomach Protection	90%+ encapsulation
Detox Support	Limited	Liver & kidney markers improved
Technology	None	CellG8® nanoparticle delivery

Made for people like you

- Lie awake at night with a racing mind, unable to switch off no matter how tired they are.
- Wake up in the middle of the night and struggle to fall back asleep — never quite feeling rested by morning.
- Travel frequently across time zones, or work irregular hours that leave their sleep cycle constantly out of sync.
- Want to wind down more naturally at the end of the day, without relying on anything harsh or habit-forming.

04

AIBLAB Chondroitin Mucopolysaccharide -Protein

The freedom to move is part of staying young.

One day, my parents mentioned their knees had been hurting — that long walks had become difficult.

It stopped me in my tracks.

We talk a lot about looking good. But being able to move freely, without pain — isn't that also a part of staying young?

That question is where everything began.

So we added Chondroitin for joint support, and Manganese, Selenium, Zinc, and Vitamin D to strengthen the bones that carry you.

"MFDS-Certified Joint Health Supplement : 4x faster absorption using bovine cartilage compared to shark alternatives"

AIBLAB
Chondroitin
Mucopolysaccharide
-Protein

Suggested Use

"Take 2 tablets once daily with water."

6 Key Features

<p>01</p> <p>MFDS & GMP Certified</p> <p>: Features proprietary 3.5th-gen technology with 100x higher absorption and intracellular retention compared to standard glutathione.</p>	<p>02</p> <p>Bovine Cartilage Mucopolysaccharide</p> <p>: Optimized bioavailability using premium collagen under 500 Daltons.</p>	<p>03</p> <p>100% RDA Vitamin B</p> <p>: A vitality powerhouse containing all 8 B-vitamins to effectively catalyze glutathione production.</p>
<p>04</p> <p>6-in-1 Synergistic Formula</p> <p>: Expertly blended with Vitamin D, Manganese, Selenium, and Zinc for bone integrity and antioxidant support</p>	<p>05</p> <p>4-Free Clean Formula</p> <p>: Free from unnecessary additives including sugar, GMOs, synthetic fragrances, and artificial colors</p>	<p>06</p> <p>Meticulously blended supplementary ingredients</p> <p>: Formulated with 10 strictly selected sub-ingredients, featuring Green-lipped Mussel and Boswellia extracts.</p>

Synergy

Cartilage-Derived Chondroitin

Not a general supplement — this is Chondroitin certified as a functional health ingredient, sourced from cartilage-derived mucoidan protein for superior absorption.

Shark cartilage averages 50–70kDa in molecular weight. Cartilage-derived mucoidan sits at 14–26kDa — small enough to cross the intestinal wall far more efficiently, with research showing up to four times faster absorption.

Beyond size, biocompatibility plays an equal role. Human cartilage is built from Chondroitin sulfate, hyaluronic acid, and collagen — and cartilage-derived Chondroitin closely mirrors that composition. Sharing the same mammalian biological base, it is recognized and utilized by the body more naturally.

Functional Nutrition Design for Joint Health

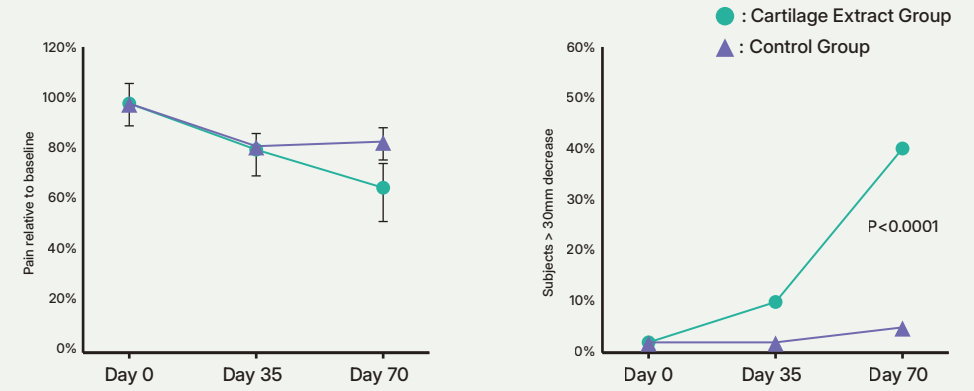

Beyond Chondroitin, we balanced five nutrients with joint health in mind — from the ground up.

Vitamin D maintains bone density and calcium absorption. Manganese builds the cartilage and connective tissue that cushion every step. Selenium fights the oxidative stress that quietly wears joints down over time. Zinc supports cartilage regeneration and keeps inflammation in check. Vitamin B Complex — at 100% RDA — sustains the energy metabolism and tissue repair that happen in the background, every single day.

Cartilage is living tissue. It deserves a formula that supports the full cycle — from formation, through protection, all the way to regeneration.

Knee Joint Pain (VAS) Improvement Graph

Alexander G. Schauss(2012), Effect of the Novel Low Molecular Weight Hydrolyzed Chicken Sternal Cartilage Extract, BioCell Collagen, on Improving Osteoarthritis-Related Symptoms: A Randomized, Double-Blind, Placebo-Controlled Trial

*The above human application test results and content may not apply equally to everyone.

Test Period	70 Days
Subjects	80 people (Age 40~70)
Test Content	VAS Score Evaluation
Intake Amount	Ingested 2g of cartilage extract daily for 70 days
Result	Confirmed improvement in knee joint pain (VAS)

Made for people like you

- Lie awake at night with a racing mind, unable to switch off no matter how tired they are.
- Wake up in the middle of the night and struggle to fall back asleep — never quite feeling rested by morning.
- Travel frequently across time zones, or work irregular hours that leave their sleep cycle constantly out of sync.
- Want to wind down more naturally at the end of the day, without relying on anything harsh or habit-forming.

05

AIBLAB Vitamin D & K2 (Menaquinone-7)

Beauty flows when everything is in its right place.

Inner beauty means becoming beautiful from within. But "within" is more than skin deep.

Unexplained heaviness. Puffiness that won't go away. A body that feels like it's slowing down. The answer wasn't on the surface — it was in the flow.

When Vitamin K2 is lacking, calcium drifts into the wrong places: blood vessels, soft tissue, the layers beneath your skin. Circulation suffers. Skin loses its tone. Puffiness settles in.

We focused on Vitamin K2 — to keep calcium exactly where it belongs, and let everything else flow as it should.

*"Certified Bone Health & Immunity :
A safe, chewable design formulated even
for expectant mothers"*

AIBLAB
Vitamin D & K2
(Menaquinone-7)

Suggested Use

*"Chew 2 capsules
once daily."*

6 Key Features

<p>01</p> <p>MFDS-Certified Health Functional Food (GMP)</p> <p>: A product certified by the Korean Ministry of Food and Drug Safety to support bone health and immune function.</p>	<p>02</p> <p>Pregnancy-Safe Design</p> <p>: Highly biocompatible material with 4x higher absorption efficiency than shark cartilage</p>	<p>03</p> <p>High-Potency 4000 IU</p> <p>: Designed to effectively address the widespread Vitamin D deficiency in modern lifestyles</p>
<p>04</p> <p>From bone density to vascular inner beauty</p> <p>: A dual-action mechanism where Vitamin D3 facilitates calcium absorption, while K2 (MK-7) directs calcium specifically to the bones.</p>	<p>05</p> <p>Premium Sourcing (DSM Vitamin D3 + MK-7)</p> <p>: Featuring DSM's Vitamin D3 and high-stability MK-7 for sustained absorption</p>	<p>06</p> <p>Zinc formulation (2.5mg)</p> <p>: Enhanced synergy with the addition of Zinc, an essential mineral for normal cell division and immune function</p>

Synergy

Vitamin D3

Vitamin D3 helps the body absorb calcium — but absorption alone is only half the equation. Without guidance on where that calcium should actually go, it can end up in the wrong places entirely. D3 opens the door. What happens next depends on what's alongside it. Used together with K2, the calcium absorbed is directed precisely to bone and cartilage, where it belongs — rather than accumulating in soft tissue or blood vessels.

Vitamin K2 (MK-7)

K2 acts as the body's internal routing system for calcium. By activating MGP proteins, it actively prevents calcium from depositing in soft tissue and blood vessel walls — a process that, left unchecked, can stiffen circulation and dull the skin's natural vitality. The result is more than structural: better calcium placement means improved circulation, which contributes to skin tone, reduced puffiness, and maintained elasticity. This is why we included both — not simply to support calcium absorption, but to ensure that calcium is used exactly as it should be.

Zinc

At just 2.5mg per tablet, Zinc punches well above its weight. It supports bone formation, drives cell regeneration and protein synthesis, and bolsters antioxidant and immune function — all at once. The downstream effects show up where it matters most: stronger bones, clearer skin, and a more balanced complexion. Small in dose. Significant in impact.

Vitamin K2 MK-7 Mechanism of Action

Bone Health

Vitamin K2 activates (via Carboxylation) an enzyme called Osteocalcin, which helps blood calcium be well absorbed into the bones. It works to ensure calcium is smoothly absorbed into the bones, playing a crucial role in preventing Osteoporosis and improving bone health.

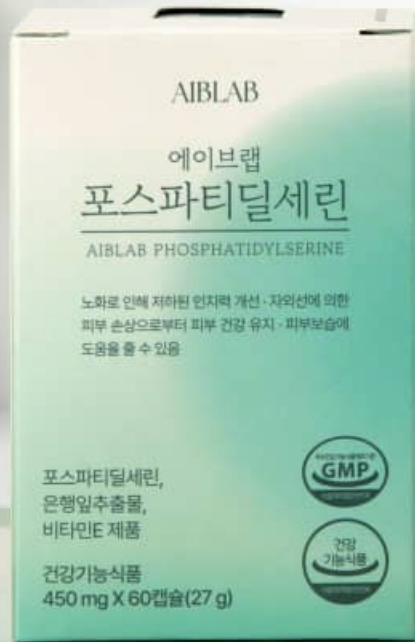

Cardiovascular Health

Vitamin K2 activates MGP (Matrix Gla Protein), a very important enzyme that regulates calcium metabolism in blood vessels. It prevents calcium from accumulating in blood vessels (Vascular calcification), thereby preventing arteriosclerosis and significantly reducing the incidence of cardiovascular diseases. It is the best vitamin of the 21st century.

Made for people like you

- Lie awake at night with a racing mind, unable to switch off no matter how tired they are.
- Wake up in the middle of the night and struggle to fall back asleep — never quite feeling rested by morning.
- Travel frequently across time zones, or work irregular hours that leave their sleep cycle constantly out of sync.
- Want to wind down more naturally at the end of the day, without relying on anything harsh or habit-forming.

06

AIBLAB Phosphatidylserine

Before the fog sets in,
take care of the mind
that carries you.

Focus fades. Memory slips. The mind grows heavy under the weight of stress, screens, and the quiet passage of time.

Watching my parents, and noticing changes in myself, I realized what was needed wasn't another caffeine boost — it was something that works at the level of the brain itself.

And inner beauty had to be part of it, too.

Three ingredients, each recognized for their functional benefits in Korea: Phosphatidylserine, Ginkgo Biloba Extract, and Vitamin E — brought together as one considered solution.

"MFDS-certified for memory and blood circulation support, designed as ultra-small freeze-dried capsules that are easy even for parents to swallow."

Suggested Use

"Take 2 capsules once daily with water."

AIBLAB
Phosphatidylserine

6 Key Features

<p>01</p> <p>MFDS-Certified Health Functional Food (GMP)</p> <p>: A premium product directly formulated by pharmacists and doctors, with firmly recognized functionality and safety.</p>	<p>02</p> <p>6-in-1 Functional Formula</p> <p>: Comprehensive care in one product, from cognitive and memory improvement to blood circulation, skin hydration, UV care, and antioxidant support.</p>	<p>03</p> <p>Premium Phosphatidylserine</p> <p>: A high-end ingredient shown to help improve cognitive function after 12 weeks of intake, meeting 100% of the MFDS recommended daily intake of 300 mg.</p>
<p>04</p> <p>Brain, Circulation & Skin Health</p> <p>: An all-in-one formula precisely designed to target the body's key needs, supporting both brain and skin health at the same time.</p>	<p>05</p> <p>Premium UK Marine Calcium</p> <p>: A carefully selected additional ingredient blended to create optimal synergy with the three main functional ingredients.</p>	<p>06</p> <p>Small Freeze-Dried Powder Capsules</p> <p>: Made with a special process that helps protect heat-sensitive ingredients, in very small capsules that are easy for parents to take every day. (2 capsules per day)</p>

Synergy

Phosphatidylserine

Phosphatidylserine is one of the most important building blocks of the brain cell membrane. By improving signal transmission between neurons, it helps restore what time and stress quietly take away — memory, focus, and mental clarity. Recognized by Korean food safety authorities for improving age-related cognitive decline, it also supports skin repair and moisture retention, bridging brain health and inner beauty in a single ingredient.

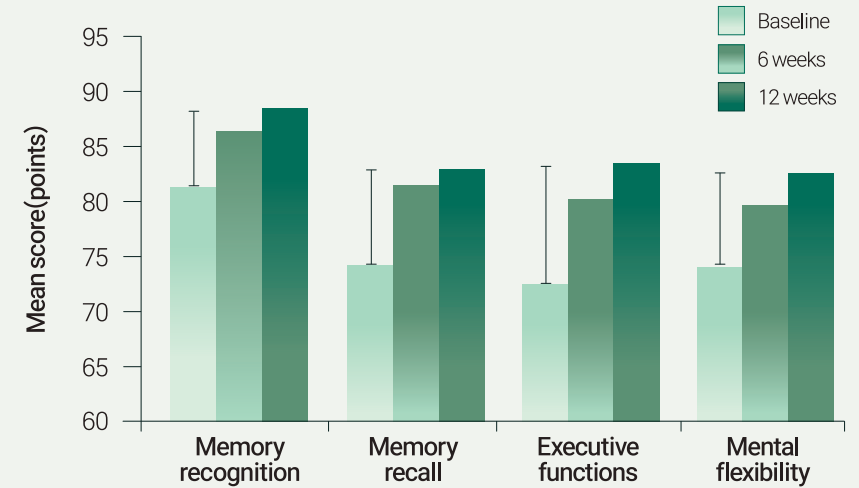

Ginkgo Biloba Extract

Sharp thinking requires good circulation. Rich in flavonol glycosides and terpenoids, Ginkgo Biloba promotes cerebral blood flow — ensuring the brain receives the oxygen and nutrients it needs — while protecting neurons from the oxidative stress that accumulates over time. Recognized for its functional benefits in supporting both memory and healthy circulation.

Vitamin E

Every cell in the body faces a constant low-level threat: oxidative stress from free radicals generated by daily life. Vitamin E works at the membrane level — the outermost layer of each cell — to intercept that damage before it takes hold. For brain cells in particular, this protection matters deeply. Recognized for its role in shielding cells from harmful reactive oxygen species, it quietly does the work that keeps everything else intact.

Cognitive Function Improvement Graph

Test Period	12 Weeks
Subjects	78 people (Age 50~90)
Test Content	Evaluation of Phosphatidylserine efficacy on cognitive function improvement
Intake Amount	300mg of Phosphatidylserine ingested daily
Result	Confirmed improvement in cognitive function

Made for people like you

- Struggling to focus, memory quietly slipping, thinking not as sharp as it used to be.
- Worried about your parents' cognitive health — wanting something safe, gentle, and truly effective for them.
- Living under constant high-pressure work or study, the brain running on overload, craving recovery from within.
- Not satisfied with quick-fix stimulants — seeking a real solution that works at the brain level while nurturing inner beauty.

Awaken Your Inner Beauty
